PROFILE

Highly motivated and detail-oriented recent graduate with a strong background in data analysis. Skilled in using tools like SQL, Python, and Excel for data manipulation and analysis, along with experience in visualizing data through Power BI.

EDUCATION

- Maharishi Dayanand University, *Haryana, India*
Master of Science in Computer Science **Pursuing**
- Maharishi Dayanand University, *Haryana, India*
Bachelor of Science in Non-Medical 2021 – 2024
- Urmila Public Sr. Sec. School, *Haryana, India*
12th in Non-Medical 2020 – 2021
- Urmila Public Sr. Sec. School, *Haryana, India*
10th 2018 – 2019

Tools and Coursework Information

Tools: SQL, Python, Excel, Jupyter notebook, PyScripter, Sublime Text, VS code, Command Line Client, Google Colab, Spyder

Software Packages: Numpy, Matplotlib, Pandas

Python: List, Tuple, Dictionary, Set, Indexing, If-else, Loops, Strings, Object-oriented Programming (OOP) System, Inheritance

Power BI : Data Visualization, Power Query, Data Modeling, DAX (Data Analysis Expressions), Dashboard and Report Building, Data Integration, Power BI Service

HTML: Semantic Elements, HTML Entities, IDs and Classes, Inline and Block elements, Forms and Input Validation, SEO HTML Tags, Lists and Tables, Media Integration, Cross-Browser Compatibility

EXPERIENCE

Senior Analyst at Telus International

Feb 2026 – Present

- Prepared and uploaded cleaned client data into SQL databases, ensuring correct table structures, schema alignment, and zero data loss.
- Managed daily data staging and production uploads, keeping client databases updated, synchronized, and ready for reporting.
- Designed and executed automated processes from end-to-end for operational tracking (MIS reporting) through Python scripts, which saved over of 92% with easy, accurate & timely delivery to leaders
- Built interactive Power BI dashboards and reports to track key business metrics (KPIs) and help management make data-driven decisions.
- Performed rigorous data quality checks and auditing on raw client data to clean duplicate records, detect anomalies, and maintain 98%+ data accuracy.

Data Annotator at Cogito Tech

Mar 2025 – Feb 2026

- Used ChatGPT and Gemini to extract and synthesize medicinal and pharmaceutical data, improving data quality.
- Validated medical terms, drug interactions, and treatment data using AI tools to ensure healthcare data accuracy.
- Performed image, text, and video annotation for supervised machine learning models in diverse domains such as healthcare, autonomous vehicles, and retail analytics.
- Proficient in Labelbox, CVAT, and VGG Image Annotator, following project-specific labeling guidelines.
- Maintained annotation quality through regular reviews, achieving **95%+ QA accuracy**.
- Supported annotation reviews and workflow documentation to enhance onboarding and project efficiency.
