PROFILE

Highly motivated and detail-oriented recent graduate with a strong background in data analysis. Skilled in using tools like SQL, Python, and Excel for data manipulation and analysis, along with experience in visualizing data through Power BI.

EDUCATION

- Maharishi Dayanand University *Haryana, India*
Master of Science in Computer Science **Pursuing**
- Maharishi Dayanand University *Haryana, India*
Bachelor of Science in Non-Medical 2021 – 2024
- Urmila Public Sr. Sec. School *Haryana, India*
12th in Non-Medical 2020 – 2021
- Urmila Public Sr. Sec. School *Haryana, India*
10th 2018 – 2019

Tools and Coursework Information

Tools: SQL, Python, Excel, Jupyter notebook, PyScripter, Sublime Text, VS code, Command Line Client, Google Colab, Spyder

Software Packages : Numpy, Matplotlib, Pandas

Python : List, Tuple, Dictionary, Set, Indexing, If else, Loops, Strings, Object-oriented Programming (OOP) System, Inheritance

Power BI : Data Visualization, Power Query, Data Modeling, DAX (Data Analysis Expressions), Dashboard and Report Building, Data Integration, Power BI Service

HTML : Semantic Elements, HTML Entities, Id's and Class, Inline and Block elements, Forms and Input Validation, SEO HTML Tags, List and Tables, Media Integration, Cross-Browser Compatibility

EXPERIENCE

Cogito Tech

Noida, India

Data Annotator

03/29 – Present

- Used ChatGPT and Gemini to extract and synthesize medicinal and pharmaceutical data, improving data quality.
- Validated medical terms, drug interactions, and treatment data using AI tools to ensure healthcare data accuracy.
- Performed image, text, and video annotation for supervised machine learning models in diverse domains such as healthcare, autonomous vehicles, and retail analytics.
- Proficient in Labelbox, CVAT, and VGG Image Annotator, following project-specific labeling guidelines.
- Maintained annotation quality through regular reviews, achieving ****95%+ QA accuracy****.
- Supported annotation reviews and workflow documentation to enhance onboarding and project efficiency.

PROJECTS

Python Developer Specializing in AI Powered Voice Assistance.

- Experienced Python developer with hands-on experience building voice-controlled applications using libraries such as, SpeechRecognition, and web browser.
- Developed a virtual assistant capable of executing web-based tasks and retrieving live data via APIs (e.g., News API).
- Familiar with error handling, command processing, and integrating music libraries for dynamic playback.

Credit card financial dashboard using power BI.

- Developed an interactive dashboard using SQL-based transaction and customer data to deliver real-time insights.
- Streamlined data processing & analysis to monitor key performance metrics and trends.
- Shared actionable insights with stakeholders based on dashboard findings to support decision-making processes.
